

k and Ultra Low- Electromagnetic Composites Based on Sintered Titanates for Fused Deposition Modeling Band Antennas and Filters.”

The Engineering Science Symposium is an annual showcase of the research conducted by SHPE students and faculty members. The Symposium has two components: (1) paper presentations and (2) poster presentations. De Dios Castro received a travel award to give an oral presentation during the 2016 SHPE Conference, November 2-6, 2016, in Seattle.

The other co-authors on the paper are Eduardo Rojas-Nastrucci, a doctoral candidate in the Department of Electrical Engineering; Jing Wang, associate professor in the Department of Electrical Engineering; and Thomas Weller, professor and chair in the Department of Electrical Engineering, and director of

Top 25 research university among public institutions nationwide in total research expenditures, according to the National Science Foundation. Serving over 30,000 students, the USF System has an annual budget of \$1.5 billion and an annual economic impact of \$4 billion.
